Summary

As a web developer, I provide service for creating full-fledged websites that are responsive, user-friendly, and secure. I have been working in this role since January 2024, and I have successfully delivered multiple projects for various clients, meeting their requirements and expectations. I use Node.js and Bootstrap as my main tools, along with Git for version control and collaboration.

I am also a first-year Information Technology and Engineering student at Dr. A.P.J. Abdul Kalam Technical University, where I am pursuing my passion for programming and technology. I have a robust command of data structures and algorithms, and I am eager to learn new skills and frameworks. I have also participated and excelled in several national and international competitions, such as Toycathon, Tinkerpreneur, and Microsoft Imagine Cup, securing runner-up positions. I am dedicated to pushing boundaries and shaping the future of technology, and I am open to collaborations and networking opportunities for groundbreaking ventures.
